

July 19th

To: Mark Souza  
&  
Village Board

I am writing about my Water Bill received in July 2022. I feel the board should adjust my bill. It shows I used 3,354 more gallons than normal. The village employees alerted me of higher than normal usage. I went through my house and found no leaks anywhere. We did a dye test in the toilets and also found no problems. There is only 2 of us in the house. I invited the village employee to come into my house to check things out and they refused and stayed in their truck. Then all of a sudden it stopped. Village employee said something about finding a faucet in my trash a long time after this and that was a faucet out of my camper. I have proof if you need it.

My Water & Sewer bill is always around \$160.00 on average. If the board would lower my bill I would appreciate it.

July 19<sup>th</sup>

I would also like to know why the EDU and cost per unit is no longer on the bills.

I feel the residents who pay water & sewer bills have the right to know. I used to be on the bills and then just stopped.

Thank you
